Recommendation for FL Technics

Transaero Airlines selected FL Technics as a strategic partner for B737 heavy maintenance since 2008. Over the last 3 years we have completed some 40+ heavy maintenance projects at FL Technics, which have been ranged from simple C1 checks to heavy D-Checks with major structure work. Our choice of FL Technics as an exclusive MRO partner for Transaero's narrow body fleet is based on their flexibility, great value for money service, as well as competitive downtimes for all their projects. FL Technics has been supporting us as a true one-stop-shop maintenance partner, delivering wider services like Landing Gear overhaul and lease, engine support, capability list, coupled with a very strong logistics team for consumables and spare parts, help reduce the downtime for our aircrafts serviced in FL Technics hangars.

Being satisfied by FL Technics we have extended our cooperation into spare parts support, technical training, line maintenance, and other services.

Deputy General Director
Head of Technical Department
